DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment mailed March 01, 2002.

Claim 12 was amended rendering Claims 2-9 and 12 pending with Claim 11 held to a non-elected invention. Examiner withdraws the Final Rejection to further prosecute to claimed invention.

Claim Rejections – 35 USC 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2-9 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Patel et al. (US 5,385,783) in view of Sakumoto et al. (US 5,683,806) further in view of Leeuwenburgh (U.S. 5,935,669).
4. Patel discloses a high temperature – resistant masking tape comprising a paper substrate, a release coat on one surface of said paper, and an adhesive on the other surface of said paper (abstract; col. 2, lines 1-5). Patel discloses a maximum heat resistance of 165°C (specification, col. 1, line 23) and a tape comprised of conventional crepe paper (specification, col. 1, lines 59-60). The reference discloses a tape that is rolled up on a core (specification, col. 1, line 42). Patel does not disclose a film. While Patel does not disclose a specific width or thickness for the adhesive tape, he does state that the tape can be prepared into predetermined

widths and lengths. Patel does not disclose that the masking film is folded. Patel does not disclose a polyolefin film.

5. Sakumoto teaches an adhesive tape comprising a heat resistant base film and a protective adhesive layer laminated on at least one surface of said base film (abstract, col. 2, lines 1-3). This protective laminated adhesive layer can be made out of polyolefin, such as polyphenylene (specification, col. 1, line 21). Sakumoto teaches that the protective layer has a thickness of from 1 to 200 μ m (specification, col. 2, line 54-55).

6. Patel and Sakumoto are analogous art because they are from the same field of endeavor, that is masking tape. At the time of the invention, it is obvious to a person of ordinary skill in the art to combine the protective laminated adhesive layer of Sakumoto with the adhesive layer of Patel in order to provide protection for the adhesive layer of Patel so it would not lose its bonding properties. Neither reference teaches the masking film being folded or the masking film extending beyond said second edge of the masking paper.

7. Leeuwenburgh teaches a cover sheet folded with extending folds protruding beyond the other folding layers, an adhesive tape being fastened along the longitudinal edge portion (abstract) where the folded material is rolled (column 1, lines 64-65). Although Leeuwenburgh does not explicitly teach his cover sheet is a masking strip, it comprises the same materials and has the same function as applicants claimed masking strip, absent any evidence to the contrary. All the references are analogous art because they are from the same field of adhesive tapes. It would have been obvious to one of ordinary skill in the art to fold the masking strip of Patel leaving extended portions because Leeuwenberg teaches this is a conventional practice within the art and the extended portion can be used to adhere the strip to various surfaces.

Response to Arguments

8. Applicant's remarks to 35 USC 112, first paragraph have overcome the rejection due to amendment of claim 12. Applicant's arguments to 35 USC 103(a) are rendering moot based on new grounds of rejection.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lawrence Ferguson whose telephone number is (703) 305-9978.
